

Highly reliable fuel cell breathalyser

ACCURATE

EASY

FAST

Quick and accurate test

DA-8000

Professional fuel cell sensor

Provides high accuracy and stability, showing a better performance than semiconductor breathalyser.

Highly accurate readings

Indication of 0.000 to 0.500% BAC. B.A.C at an accuracy of +/- 0.005%BAC.

Four digit redings display

Helps Indicate much more accurate and sensitive test result. (Only available in % B.A.C mode)

Low battery warning

Advises user to know the correct time for changing the battery.

Automatic power-off

Provides convenience by eliminating the need to turn off power.

Test number display

Helps get on-time calibration service properly.

Adjustable user setting

Blow time, Unit, Beep alarm, Blow detecting

12 month warranty

Fully gurantees 12 month warranty against faulty workmanship.
